Solar Shields

Installation and Specification Guide

PRODUCT DETAILS

Prevent algae growth by keeping sunlight out of your tank without interrupting the flow of rainwater.

TASS24 300mm
compatible with Tank Screen TATS11

TASS25 400mm
compatible with Tank Screen TATS12

TASS26 500mm
compatible with Tank Screen TATS02

FEATURES AND BENEFITS

- Protect stored rainwater quality
- Fits under the tank screen
- Reduces light and algae growth in your tank
- Calms the entry of water into the tank to minimise sediment resuspension.
- AS/NZS 4020 compliant

Installation

WHAT'S IN THE BOX?

- Solar Shield

TOOLS/MATERIALS YOU MAY REQUIRE

- Screwdriver or drill
- Screws

INSTALLATION

- If you already have a tank screen installed, you must remove it prior to installing the Solar Shield.
- Place the Solar Shield in the tank inlet hole so that the arms rest on the top surface of the tank and the Solar Shield is suspended in the inlet. Rotate the Solar Shield to align the screw points with the existing screw holes in the tank, if there are any.
- Place the tank screen over the Solar Shield, making sure to align the screw points with the Solar Shield arm lugs.
- The tank screen should drop into place so that the outer rim is flush with the surface of the tank.
- Secure the tank screen and Solar Shield in place using screws that are suitable for the tank material. The Solar Shield will accept screws up to 8 gauge in size.

MAINTENANCE

When properly installed, your Solar Shield should be maintenance-free. However, we recommend to occasionally to inspect and maintain the Tank Screen above it.

Alternatively, you may wish to consider installing a Maelstrom Filter rather than using a Solar Shield and Tank Screen.

Disclaimer
